**DECEMBER  
2022**

## Introduction

The cryptocurrency community has made a massive growth during the past few years, and this has created more financial gains among normal everyday people than in any other industry ever before. This raises the question, where and how all this money will be spent?

United is a cryptocurrency that you can use for everyday purchases directly with United crypto cards everywhere where Visa and Mastercard are accepted, making the usage of your cryptocurrency as simple as it is with traditional money.

## The Ecosystem

The ecosystem United is connecting people from every continent

- To book hotels or plane tickets using United directly with partner merchants like Space travel.
- Trade or arbitrage United it in multiple public exchanges.
- Use U-land marketplace, where anyone can buy or sell wide range of products and services with cryptocurrency.

We are developing unique and secure environment where users can find all the solutions what is missing from crypto society today. United is focused on providing money management services for cryptocurrency users, simplifying daily use of cryptocurrency, as a result, bringing sustainable revenue stream in the form of recurring usage of our services for the company.

## The Vision

United's vision is to make cryptocurrency so accessible and easy to use, that the whole world recognises cryptocurrency as Money!

## The Mission

United's mission is to simplify the use of the cryptocurrencies for daily use. We are connecting the people worldwide to use cryptocurrency as simply as they use traditional money today.

## Challenges

Cryptocurrencies have been existing for more than a decade and there are many projects in the market that every crypto enthusiast can be proud about. The problem is, that cryptocurrencies are still not usable as currencies, crypto adoption and regulations are weak or underdeveloped and many countries have even banned or restricted their people owning or trading cryptocurrencies.

Lack of information and regulations creates distrust among people, making it harder for the real companies to stand out.

There are companies who are creating a path for usability of the cryptocurrencies, but they are either moving very slowly or are very limited by only certain regions. Cryptocurrency should be easy to use for everyone from every part of the world, race and nation.

## Our Solution

### UNITED PREPAID VISA and MASTERCARD

On the December of 2022 we are releasing United debit Crypto cards which will take crypto usage to millions of shops in 86 countries.

Cards on the first release are available to order only in UK and EU users, however already in the first half of 2023, the cards will be available also to most countries In Latin-America and By the end of 2023, possibly first Asian and African countries.

## How it works?

Since the only currency in the card is the United token and all service fees, transaction fees, ATM fees, etc. will always be paid in United token, which besides unlimited new use cases will create a necessity for each card user to buy and consume United token every month, therefore every new member creates more demand for United token.

Simply said, United Card is like a car and the United token is like fuel.

The card base currency is the United token, which means that the card cannot be used without having United.

Keeping only United as usable currency on the card means by default increase in demand and trading volumes. To bring out the example of the car, then the more cars driving around, the more fuel is needed and in the case of United, the tokens are limited, therefore every new card user makes United more valuable.

Users can deposit any of the mainstream cryptos into EliteX Exchange and swap it into a United token for loading the card. EliteX Exchange is our partner exchange that is issuing United Cards. <https://www.elitex.exchange>

Since the card will operate with UTED/USDT live rate, then every user needs to buy UTED in order to use the card. Meaning that every card loading will result in a BUY order and every card usage for purchasing goods or services with a card results in a SELL order in the public market. This means if 100 000 members make an average of 10 purchases and one card loading average per every **month**, then there are an average 36 666 transactions per day, 1527 transactions per hour, and 25.5 transactions per minute.

Card will have monthly service fees that can be paid only in United Token. All transaction fees, ATM withdrawal fees, Card activation fees etc, will be charged in United (UTED).

The Service fees create a higher need for United Token inside of our economy which theoretically will create constant growing demand and higher liquidity and trading prices for United token.

## U-Land

U-land started as a simple real estate listing platform where people could advertise their real estate what they are selling with cryptocurrency.

Today we have added basically every sale or buy category that people possibly might want to sell or buy with Cryptocurrency.

Anyone can go there and add anything to this platform for free. U-land ads are not limited to United users only, It is for everyone who wants to buy or sell something with cryptocurrency.

In November of 2022, The U-Land Mobile application was released. The next thing in line will be internal wallets and crypto auctions.

Auctions will be initially the only service which will not be free to use. Every auction holder has to own United in their wallet to launch it.

However for the bidding just needs an existing balance to buy the product that you are trying to buy.

Advertisement space and extra features of the platform like Video add, will be able to unlock only when the user has United on the wallet balance, same way as with the auctions itself.

All of this above will increase the demand of United token and the necessity of the token for the customers. Principle is the same as the crypto card, it will create value growth for the token with every added new customer on the platform.

More info at [www.u-land.eu](http://www.u-land.eu)

## Partner Merchants

Imagine that you are traveling into a new country, and you own some BTC, TRX or any other mainstream cryptocurrency. You are hungry and you enter a restaurant. You see a sign on the door, "UNITED accepted here".

You make an effortless transaction with United token and in case you don't own any, you can buy it from the same restaurant.

Your friendly waiter is suggesting you download the application called "U-Land" which shows you all the products and services you can pay for, in the same city, with United token!

This is not only a future vision; U-land already allows any crypto business to be added to the map by anyone who desires it.

See how it works at [www.u-land.eu](http://www.u-land.eu)

We have made a contract with an Estonian based company who is selling traditional card terminals which besides regular Visa and Mastercard are also accepting all mainstream cryptos. This means potentially that every merchant who is buying terminals from them, will accept United directly from wallet to wallet transaction.

More info at [www.valkmakse.ee](http://www.valkmakse.ee)

The biggest usability of United tokens today is going through the Space Travel platform which allows people to use cryptocurrency for traveling. People can book hotels, buy flights or rent cars directly with cryptocurrency.

The platform like this has a huge demand for people who wish to use their cryptocurrency without converting it into traditional currency.

if you didn't know that such opportunity exists, then go try it out at [www.spacetravel.luxury](http://www.spacetravel.luxury)

## Tokenomics

As United Tokens are the only currency that is usable with United crypto cards, then people need to change their BTC, ETH or USDT into UTED, to be able to use the United Crypto cards.

In addition also all card activation, monthly fees, transaction fees, ATM fees etc will be charged in UTED.

It might be one extra step for people who do not have any UTED, however this move will create a strong utility for United token which will cause constant rising demand and will increase with every new member who will start using United Crypto cards.

Card will initially work only with Stellar based United tokens which is a brand new contract due the low transaction fee compared with BSC or TRC20 chains. This is needed for smooth and cost effective flow of the funds in the back end.

At the time when we start sharing out the cards, we start changing tokens for current users also from the TRC20 and BSC to Stellar based UTED to gradually merge all chains, without creating large extra supply on the market and devaluating the value, but regulating it internally until all chains have enough liquidity for merging.

### **STELLAR CONTRACT:**

GBFB43FPLZYOY6SFBUZYHMXVTX2Y7KKWRTETGGWZV3XX56HJETHGU4R76

### **BSC CONTRACT:**

0x951df2682ff9a963c4243a38d3841c9ba471b8ae

### **TRC20 CONTRACT:**

TKstdBzdwiwhPy6mz9cGDsyNrqrJrTCyqoC

## Locking Contracts

All The United tokens (UTED) which were held by United technologies or bought back from the market are locked into public contracts with the Time Lock.

Merging the TRC20 chain and BEP20 Chain should have happened already in the EliteX exchange in 2022 however the EliteX platform is not fully finished to accommodate a large number of users. Until the platforms get finalized and systems are ready, we lock all the Treasury into Smart contracts.

The Reason of locking the tokens is mainly security and transparency.

**When Tokens are locked with Time lock, it cannot be unlocked prematurely, which means that there is no possible way for a rug-pull or for hackers to steal the tokens.**

As we expect to get EliteX running in the next few months and we want our users to have an easy way to change between TRC20 and ERC20 chains, then all Treasury is shared into different contracts.

Every contract has different vesting periods in order to make it possible for Exchanging the user tokens from one chain to another.

## BSC Tokens

200 000 000 UTED BSC are locked in the contract:

Oxe1f27891AA5226ea936536A3851159OC9208246b

The Contract will open on 1 May 2023.

280 000 000 UTED BSC Is locked in contract:

Ox95B6657e3225e1de073D2A9a77bEAd14Eeb75acd

Vesting will release all the tokens in 52 weeks, each week 280 000 000/52

## TRC20 Tokens

210 000 000 UTED BSC are locked in the contract:

THVzf9DLbGjN9txiGn7JXqFWa3cyYoQRVe

Vesting will release all the tokens in 6 months, Each month 210 000 000/6

All Tokens in all chains, what will not be used for changing from one chain to another for current users or for marketing activities will be locked into smart contracts again, to keep the system safe and transparent.

## Token Holders

This is updated from 1 Dec 2022. New Data is also shared with Coinmarketcap and Coingecko. The Supply figures will be updated on those platforms in upcoming weeks.

### **TOTAL SUPPLY CREATED (BSC and TRC20)**

1 000 000 000 UTED

### **TOTAL SUPPLY BURNED (sept 2021)**

450 000 000 UTED

### **TOTAL CIRCULATING SUPPLY (Dec 2022)**

272 000 000 UTED

### **LOCKED IN TREASURY**

278 000 000

### **FUTURE**

218 000 000 will be shared together with a card program and expanding into new regions together via Vesting and reward plan over the next 20 month period.

5% of total UTED will be shared as a reward with Team in 2024.

Team tokens will be locked into public contract after merging the chains in the first part of 2023.

Every contract address is public and can be followed by anyone.

Stellar Locking will be announced in next 8 weeks, as soon as it is locked into contract.

## ROADMAP 2022-2023

**June 2022** - EliteX and United wallet New Interface, Back and Front. New Staking Pools; Sunswap start

**Oct 2022** - New United staking pools

**Nov 2022** - U-land Application

**Dec 2022** - Virtual United cards released in first countries. Bitmart listing, Kanga Listing

**Jan 2023** - U-land Auctions and EliteX integration, New DEX and CEX staking pools, Bridge between BSC and TRC20, United Merchants

**Feb 2023** - United Physical cards in EU and UK, New EliteX exchange, Card Terminals, and ATM

**March 2023** - Increasing the Limits of the card. United Physical cards reach LATAM and ASIA, Bridge Between Stellar and other chains

**June 2023** - United Card Partnership with a world-known Brand.

**July 2023:** Launching Second generation United Credit cards and crypto loans. United DEX Launch

**Aug 2023:** Creating Worldwide postal options for U-land.

**Nov 2023:** Launching United Merchant wallet system for businesses

**Q1 2024:** Improving the customer interface of the application for card loading and Transactions Increasing the spending limits and credit in United cards.

**Q2 2024:** United DEX cards, Crypto accountancy system and payment systems for companies.

## Team

### KENT KRUUSMAA - FOUNDER
